## **Press Release:**

### **ND Spatter Nix:**

## **A Breakthrough in Weld Spatter Build-Up Prevention**

ND Industries®, an internationally known developer and supplier of high quality fastener coating products and services is pleased to announce the latest break-through in weld spatter prevention, ND Spatter Nix.

Ever expanding into new markets, ND has now turned its attention on the persistent problem of weld spatter.

Pulling from 50 years of research used in the development of ND patented assembly technologies, such as e-coat preventatives, ND Design Engineers discovered this unique coating process that surpasses existing spatter preventative methods.

ND Spatter Nix:

- Helps prevent weld spatter encrustation and buildup
- Improves MIG gas flow and weld quality
- Reduces the need for nozzle cleaning
- Makes nozzle cleaning faster and easier
- Increases the lifespan of MIG weld nozzles
- Eliminates the need for anti-spatter dips and sprays

After trial running ND Spatter Nix at several welding facilities, the response was outstanding in automotive plants and tool and die welding facilities.

ND Spatter Nix can help you increase the efficiency of your welding applications by reducing periodic maintenance and improve the overall productivity of your assembly line.

For more information on ND Spatter Nix and other ND products and services contact ND Industries' Corporate Offices at 1000 North Crooks Rd., Clawson, MI 48017. Phone 248-288-0000, Fax 248-288-0022 or email [info@ndindustries.com](mailto:info@ndindustries.com).
